I am very glad to have the opportunity to send you my resume.

Objective

Start a junior frontend developer career in the company and after 1 year working grow to middle.

Summary

I have been using HTML / CSS (SCSS/SASS) / JavaScript for one year as well as React.js for half a year, developing various projects of varying complexity. I have basic knowledge of PHP. I also have experience in SQL programming and working in graphics packages such as Photoshop and Figma. I have good analytical skills. I am easy to learn. I have an experience working in team using version control system GIT.

Skills

- HTML / CSS (SCSS / SASS) / JavaScript.
- React.js;
- GIT;
- SQL;
- Windows;

Experience

HTML / CSS / JavaScript / SQL: the Last year I wrote course work in the university on subject “databases” and I created database of films and using HTML/CSS/JavaScript and this database I wrote movie site;

React.js / SQL: this year I am writing a term paper on "developing an online store for digital gadgets." I split the work into 2 parts: first, create a database of gadgets (computers, phones and laptops), and then using it to develop the online store by React.js. And this project can be seen in my Github account.

React.js / Redux / GIT / working in team: after finishing React course in academy our group had to develop our own project (movie site), using Redux and GIT. But, unfortunately, we did not finish it so I kept it and now I am developing this project by myself.

Education

I am a student of Kiev national university of trade and economics. I am studying software engineering at my 4th bachelor year. I also took English courses, and reached an advanced course, took two JavaScript courses (basic and advanced) and one React.js course.

Additional information

- Upper-intermediate level of English;
- I'm not married;
- I like doing sport, reading motivational books and playing guitar;

I am ready to answer your questions. I would be very happy to have the opportunity to introduce myself in an interview. Have a good day!
